

gress of pneumonia. Members of the sacred college remained in the ante-chamber of the sick room during the night, while physicians and attendants of the pope's chamber were in attendance. It was feared the end might come at almost any moment.

Immediately after the morning consultation of his physicians, the pope had a quick nap. His sleeping was quite irregular and after he had expressed a desire to rest, he turned on his side and fell asleep immediately. The physicians were surprised at this and thought there might be some reason why his holiness if he were able to sleep 3 or 4 hours.

SLEEPERS DURING NIGHT

The pope dozed from 8 until 3 o'clock when a curial was administered to him, Saturday being the feast day of St. Andrew the Apostle, a youthful student, the pope asked to be shown a small statue of the saint with which the students of the college had presented him. The statue was placed on the altar of

Shortly after 8 o'clock the physicians gave out their bulletin announcing that the pope was in a favorable condition of improvement. Then came the slow and measured breathing which when it was stated by his holiness was resting easier. The cardinals began to appear to make their visits. Among the first to appear were Cardinals Merry Del Val, Lefebvre, Lavigerie and Cardinal Amleto Cicalelli. The foreign ambassadors, anxious for news, also began to send in requests for information on the pontiff's condition.

WATCH DURING NIGHT

Throughout the night there was almost absolute silence at the Vatican, with only a few guards pacing up and down and here and there attendants. The top floor, where the pope's apartments were, was almost deserted save for one guard near the entrance of the pope's chambers.

Inside the apartments there was the most intense solemnity as hours of the night passed, with the condition of his holiness apparently becoming worse. Each visitor

(Continued on Page 2.)

SCREEN AND STAGE

EDWARD CULLEN, VALERIE VALAIRE and BRANDON EVANS in "THE BAT"

"Every girl her own hairdresser" has become the motto of Ruth Renick since her return from Tahiti, where she played the leading role in "The Legion of Desire." According to Miss Renick, the ladies of the capital of Tahiti have exclusive and executive control of their own tresses and a professional hairdresser is unknown.

Miss Renick, who has a wealth of blond hair, has always taken care of her tresses and she whispers to girls that a lemon for shampooing is one of her favorite recipes.

Miss Renick is a Texas girl and was on the stage four years before entering motion pictures. "Corral in Quest of His Nephew" and "What Is a Wife Worth?" are two of her best known pictures. "The Legion of Desire" will soon be released.

IN PICTURES
Ruth Goodwin, a niece of the late Nat Goodwin, has a role in William Farnum's new picture "The Three Musketeers." Goodwin formerly danced in the company of Helen Miller. Oh, yes—her first appearance on the screen was as a babe in arms.

GOOD!
Betty Blythe and Thurston Hall head a new Rex Beach production, "Rose of Selby."

LOS ANGELES—Guthrie of oranges were frozen on the trees of southern California by the frost.

is one of her favorite recipes. Miss Renick is a Texas girl and was on the stage four years before entering motion pictures. "Corral in Quest of His Nephew" and "What Is a Wife Worth?" are two of her best known pictures. "The Legion of Desire" will soon be released.

INSTRUCTIVE
Clare Windsor has leading role in the new Peter D. Kyne picture, "Brothers Under the Skins." Aside from having received considerable attention because of Charlie Chaplin's attention to her, Miss Windsor is otherwise unique in that she fears she has never been to New York.

CHILD NOTE
Mildred June, Mack Sennett comedienne is engaged to wed Dr. Edward Stamos, prominent dentist, of Pasadena.

THE HARTS WILL NOT RETURN
The new leading woman, Winifred Hart, is none other than the lovely little blonde who climbed to the top as Winifred Westover, and then about two weeks ago said the "I wills" which made her Mrs. William S. Hart. In other words, "Big Bill" Hart's bride is not going to desert the screen entirely, but is to play her future engagements as Winifred Hart. Winifred Westover is no more. She will play the support part for Bill's leads.

A real rival of Jackie Coogan has sprung up lately in the person of Master Dick Hendrick, a little cur-

Richard Hendrick.
Is-headed child of four years. He is gaining fame throughout the country for his work in "The Child Thou Gavest Me," a drama of home life made for First National. When this picture was first shown in Los Angeles in a rather

out. He stated that this new plan is the result of the many requests he has received for road shows.

Betty Compson, who has been seen in no really notable work since "The Miracle Man," in which she starred with Thomas Meighan, has again come to the stage, with her acting in "The Little Minister," to appear at the Myers theatre Monday, Tuesday and Wednesday, not showing Wednesday and Thursday. The picture is from the play of the same name by Sir J. M. Barrie, the noted English author. This is a recent release, opening but a few days ago in Milwaukee, and will be of great interest to both those who have read the story and those who have seen Miss Compson.

Scenes are laid in a Scotch village, which is faithfully reproduced on the screen. There are many mountain scenes, and Miss Compson plays the part of a young girl throughout most of the play, having some scenes in which she appears in elaborate costumes.

The week-end picture, which will appear with the four-act vaudeville program, will feature the great, favorite William S. Hart in "The Whistle." This is the first time in many months that Hart has appeared in the city and has many admirers. It will be welcome news.

AT THE MYERS.
Jansville's first road show in two years and the first show carrying an original Chicago cast in many more than two years, will appear at the Myers theatre, Wednesday, Thursday and Friday, Jan. 22, 23 and 24. It is "The Bat," written by Avery Hopwood and Mary Roberts Rinehart, which all last fall and winter, played to capacity in the best Chicago theatres. It had a full year's run in New York and has been produced in both those large cities as the best play of the season and one of the best in several seasons. It is not a musical comedy show.

"The Bat" is not a problem play; neither is it in a class with light frothy plays. Any reader of the mystery novels by Mary Roberts Rinehart will know what class of a play it is. The plot, of course, cannot be revealed, only to say that a shot in the dark, a bloody and thrust through a window, a thunderstorm, ghostly knockings, the mysterious vanishing of a young girl, and the help to make it up and add to the suspense. The suspense is relieved with the proper amount of humor.

The full Chicago cast, including Edward Cullen, Valerie Valaire and Brandon Evans, has been assured for Wednesday's showing here.

Under the new management of the Myers theatre, it is hoped that Jansville will again have an opportunity of seeing more road shows, and that those who do come here will be of the best. Two road shows a month will be seen here, if the present plans of Manager Charles Boutin are carried out.

His role in "The Whistle" is a different one than he has ever been cast in before. It is that of a factory worker. The plot also is unusual, and tells of the struggle of the factory worker with the employer to "safeguard working conditions." A heroic act of Evans, played by Hart, brings about happiness for himself, his employer and all the other workers at the huge plant.

AT THE BEVERLY.
The week-end picture at the Beverly theatre will open Sunday with Alice Lake in "The Infamous Miss Revell." Miss Lake, star of "Shore Acres" and other productions, plays a dual part in this picture, which tells of twin sisters, one of whom had a "past," and the other being forced, by her father's death, to remain at home and care for the children. Money left to one by a rich old man, complicates matters for the other, and a full confession clears up the matter for all concerned.

"Perjury," starring William Farnum, will be at the Beverly Tuesday, Wednesday and Thursday. It is the story of the fatal results of jealousy. A man becomes suspicious of his wife when his employer visits her occasionally to see the two children. He utters threats, that when the employer is killed, so against him. He is sentenced to life imprisonment, but is paroled after 20 years. He finds his wife married to another man, for the sake of the children. With the death

of her second husband, and the realization of her love for her first, all ends well.

Wanda Hawley will be seen at the Beverly Friday and Saturday in "A Kiss in Time," in which she plays a role especially suited to her type of acting and her beauty. She is a young artist who refuses to illustrate

a story for a magazine, saying that the story is impossible. The author of the story wagers that it is not impossible and that within a certain time he will win a kiss from her. His strategy in doing this furnishes the theme of the story and offers many humorous situations. Walter Miller and T. Roy Barnes play important parts.

14 CITY OFFICES OPEN THIS SPRING

Attorney, Treasurer and 7 Aldermen to Be Chosen by People.

Contrary to reports circulated the past few days, City Attorney Rorer G. Cunningham announced, Saturday, that the new charter law makes no change in the manner of naming city officers who have always been elected by the city-at-large, insofar as Jamesville is concerned. It does provide, however, that in cities incorporating in the future, the treasurer, clerk, attorney, etc., shall all be appointed by the council.

During the past few days a belief had arisen that this would affect Jamesville. The terms of City Attorney Rorer G. Cunningham and City Treasurer W. J. Lennartz expire in April, meaning that successors will be chosen at the regular spring election.

In addition the city will elect seven aldermen and four school commissioners. Aldermen whose terms expire this spring are: L. D. Hunt, First ward; W. W. Allen, Second; A. J. Gibbons, Third; George L. Traver, Fourth; J. J. Bullin, Fifth; C. J. Smith, Sixth; and Walter Helms, Seventh.

At the Theatres

Presenting for the first time in Wisconsin, the Paramount feature "Flower of the North," and giving four acts of high class vaudeville, the Myers theatre week-end bill is one of the finest in Wisconsin. The first act on the boards, "Almond and Hazel," is a distinctly unusual feature. In addition to other unique dancing, the act closes amid a beautiful scintillating snow scene. Scene and dances in the middle of the "lake" upon skates while his partner, Hazel, plays an accompaniment to the orchestra upon strings of sleigh bells.

"Flower of the North" is an unusual movie. It presents a strong outdoor and sentimental story with remarkable photography which includes the most beautiful scenery and several wonderful features of wild animal life.

Welsh & Madelon Sisters—A trio of man and two girls which, strange to say, blends in perfect harmony. An act that wins the house.

Carlton Chase—In addition to a good voice, gives some songs in a clever way.

Stella, Liliander—Poses as statuette. A highly artistic act.

\$1,000,000 Tax Case Is Fought by Dougherty

United States Attorney William H. Dougherty, Jamesville, argued the government's case in the circuit court of appeals in Chicago Friday afternoon, involving more than \$1,000,000, in 1918 taxes. The Edward Schuster company of Milwaukee brought suit against the government on the contention that they should be allowed to deduct the soldier bonus tax money passed by the Wisconsin legislature in 1919 on the federal income tax of 1918.

The government objected, claiming that the tax was passed a year later and could only be considered an offset for the year 1919. Practically every corporation in Wisconsin will be affected with the decision of the federal judges.

In event the federal court finds for the plaintiff corporation, it will mean the filing of amended income statements for 1918, and the temporary sitting in the bonus tax as a deduction.

Nations Adopt U. S. Proposal On Publicity

Washington—The American proposal to make public international agreements, including the League of Nations, was adopted in a much amended form Saturday by the Far Eastern committee of the arms conference.

Among numerous changes made was one eliminating the possibility of engagements in China by private individuals, but to which foreign governments themselves are not parties.

1922 LICENSE TAGS ARRIVE FOR CITY

New license tags for the city's cars and trucks, bought at a cost of \$230, arrived Saturday and were attached to the vehicles. The first set of tags for No. 2 and No. 3 fire trucks, Chief Charles Newman announced Saturday, that motorists have just 10 days in which to get tags. Those driving motor vehicles will be required to get license or proof that they have applied will be taken to face the chief.

EAST SIDE STREETS DARK AS WIRE BREAKS

Milton avenue and sections of streets in the southeast section of Jamesville were pitch dark Friday night due to the fact that the street lights did not function. Breaking of a circuit and a ground wire was given as the cause.

MARRIAGE LICENSES

Applications for marriage licenses were made this week at the office of County Clerk Howard W. Lee by Albert Singen, Newark, Alma G. Olson, Aved Lloyd C. Lewis, Monticello, Maude Jarman Wilson, Evansville; Oscar W. Kohn, Beloit, and Nina O. Amundson, Beloit.

WATT IMPROVING

David Watt, veteran circus man of this city, underwent an operation on one eye, Friday morning at St. Joseph's hospital, to remove a cataract. He was reported Saturday as improving from the effects of the operation. The results will be ascertained in a few days when the bandage is removed.

ROHN & CO. SUE SPENDS

New York—The New York Consolidated Exchange announced Saturday the suspension of the firm of Rohn & Co. and company of Philadelphia.

NEW COIFFURES FOR LONG AND SHORT HAIR WOMEN

By ELOISE.

Styles in hairdressing are becoming more elaborate than ever. Even the simple bobbed hair coiffure is taking on airs and for evening wear it looks just like the more elaborate headpiece of long haired misses. At the left is shown the newest style of arranging bobbed hair for evening or formal occasions. It is called the "Greek permanent wave" and is very popular in Paris. The hair is waved all over and all the ends curled up or under as the wearer prefers. Then bands of satin or metal ribbon are used after

the fashion of the ancient Greek women. It changes the piquant and juvenile looking bobbed haired miss into a classic beauty. At the left and in the center are shown ornaments which are only two of the scores of hair ornaments popular just now. The hair in both poses is piled high on the head, marcelled and brought low to cover the ears. There is no knot or twist in the back. An aigrette on a feather band of the new green blue shade makes an alluring fancy for the bobbed-haired woman. For the black-haired beauty there is the comb pictured at the right. It is a combination of white and gold made after an unusual pattern but of the usual high Spanish type.

MARCHING LEGION WITH THE

HELPED FORM STATE LEGION

the purchase for a reserved seat at the box office of the Myers theatre on a date to be announced.

DIED CORPS TO MADISON Great praise was heaped upon the post when it was announced at the Chamber of Commerce luncheon last Monday that the Legion drum corps would be sent to Madison as a contribution in boosting to bring the 1922 Wisconsin state pin tournament to this city. The corps will probably leave for the journey on Friday. The trip is to take place Feb. 2. The corps will lead a big parade which will wind through the business streets of Madison from the C. M. & St. P. station to the Palace theatre.

TO WATCH LEGISLATORS A new policy of the past was inaugurated this week when a special committee sat in on the session of the Rock county board of supervisors. The purpose was to study the methods and ways of the board as part of a new civic program. It is stated that a member of the post will be designated to attend each meeting of the city council for the same reason.

ROCKFORD MAN JOINS Harry R. Olinstead, has been transferred from the Walter R. Craig post, Rockford, to the Richard Ellis post.

OBITUARY

Mrs. Harriet Elizabeth Dunham, 82, died at her home in the town of Jamesville, Jan. 19.

Mrs. Dunham was one of the oldest settlers of Rock county, having come here with her parents in 1856. She was the daughter of Thomas and Sarah Dunham, born in Andover, N. H., Feb. 8, 1839. She attended the high school of this city, having been a member of the class of 1858.

In December, 1857, she was married to Thomas P. Dunham and in 1858 moved on the farm on the Madison road, which had since been her home. Mr. Dunham died in 1880.

Mrs. Dunham was a woman of rare character and sterling worth, and was a power for good in her home community. Her kindness of heart and sunny disposition endeared her to all.

She was the mother of four children all of whom survive her. They are Alice L. Ransom, Clara E. and Claude E. Dunham of this city, and Frank E. Dunham of Iowa. She leaves two nieces, Miss Emma Estes of Cincinnati, and Janet Cole of Oshkosh, and a nephew, Edwin, also of Oshkosh.

The funeral services will be held at Oak Hill chapel at 2:30 Sunday afternoon. Christian Science church services will be held.

War Is Started on Jazz Music in Kansas City

Kansas City, Mo.—Plans were made last night for driving jazz music out of Kansas City, Kas. The drive will start January 29 and end February 4. In this time "racy jazz" will find the city unbearable. That was the intent of the drive, which was organized by the club that is fostering the drive, and that they have reason to believe it will not be abandoned again in the homes of music lovers.

January 29 is the first day of music week in Kansas. Clubs and organizations over the state will celebrate it with appropriate concerts and programs in Kansas City, Kas. Miss Bessie Miller, supervisor of music in public schools, will direct the drive. She was selected for leader last night at a meeting of the Chamber of Commerce representatives of music clubs.

In the Churches, too Mrs. C. H. Badger, representing the Mozart Club, was appointed to arrange programs in the churches and Sunday schools. Miss Irene Halpern of the MacDougal Music Club will arrange programs in industrial centers.

January 30, school patrons will be invited to visit schools and observe musical development in pupils. Every civic club in the city will be asked to give special music programs at their weekly meetings. Roy Rawlings of the Choral Club and C. H. Smith will direct this portion of the drive.

Parent-teacher associations of the city have declared their intention of cooperating in music week. Meetings at the various schools will be given over largely to "good music."

Dean Ryan Had Hoped To Visit Pope at Vatican

The Rev. Joseph Ryan, assistant pastor of St. Patrick's church here for the past few months, will leave early in February for a European trip. He will visit the pope at the Vatican and St. Peter's Basilica. He had hoped to have an audience with the late Pope Benedict at the Vatican at Easter time.

Agree Over Ulster Line

London—Sir James Craig, Ulster premier, and Michael Collins, head of the provisional government for Ireland, formed under the Anglo-Irish treaty, issued a joint statement Saturday night, announcing an agreement regarding the question of the boundary between Ulster and southern Ireland.

May Chop up Bars for Poor Folk to Burn

Detroit—Dealers of mahogany, walnut and redwood bars, tables and fixtures from saloons raided in the Detroit district since the advent of prohibition, a display of highly polished mahogany and walnut, valued at \$200,000, may be chopped into firewood and distributed among Detroit's poor. Or, these bars and tables, over which thousands of gleaming up chairs and stools have been placed, may be made to gladden the hearts of the poor by being used as fuel for the city's power plants.

Under a state law prohibition officials confiscate the fixtures in any establishment found to be dispensing liquor. A plan to chop up the mahogany and walnut bars and tables has been proposed by the city's police officials.

WOMAN OF 57 SPELLS DOWN COLLEGE GRADS IN "SPELLING BEE"

Minneapolis, Minn.—The little red brick schoolhouse won a unique victory over the modern up-to-date school with its domestic science and vocational training, during an old-fashioned spelling bee. The "victorious" woman of 57, Mrs. E. B. Finley, 57 years old, defeated 22 graduates of high schools and colleges. The contest lasted more than three hours.

Five of Mrs. Finley's opponents were eliminated when the word "reminiscent" was reached. After 17 more rounds, the word "victorious" was reached. The word "victorious" was reached.

The "victorious" woman of 57, Mrs. E. B. Finley, 57 years old, defeated 22 graduates of high schools and colleges. The contest lasted more than three hours.

Millionaire Rushes from Alaska to Florida City to Become Mayor

Glimpse of Frank Fortune Pulver at his Alaskan camp and, below, at St. Petersburg folk.

(Special to the Gazette.) St. Petersburg, Fla.—Frank Fortune Pulver, retired millionaire chef, has rushed from Alaska to Florida City to become mayor of St. Petersburg. He is the son of a well-known Alaskan prospector.

Pulver's entry into the "Sunshine City" political light was spectacular. At the time of the recent, the millionaire was hunting wild game in Alaskan snowbanks when word was sent him by cable and relayed by runner, for his native land, the north to sub-tropical Florida and tossed his hat into the political ring.

There were eight other candidates for the mayoralty nomination. Pulver eliminated some of the white primaries while two others withdrew in his favor, leaving only the recalled mayor, who found the charter did not bar him from seeking re-election to succeed himself.

The former Rochester millionaire came to St. Petersburg as a tourist four winters ago and a year later purchased the city's largest hotel. He is the inventor of the chewing gum machine and sold his patent rights after piling up a fortune, to the Wrighleys.

He is a Republican.

What's Love Worth? \$500,000 or \$50,000? Cases to Decide

New York—What is a wife's love worth? "Half a million dollars," says Lieutenant Loring B. Graham, who is demanding that amount from Augustus L. Humes for winning Mrs. Graham's affections.

"Fifty thousand dollars," says Elizabeth C. Graham, who is seeking that sum from Lieutenant Graham for diverting the natural course of Mrs. Glennan's domestic devotion.

National attention has been drawn to this amorous dispute, and the issues are still unsettled. The final decision of the courts on the cash value of widely love is still to be fixed. The names of persons prominent in the diplomatic and industrial circles have been mentioned prominently in the volumes of testimony taken.

Perjury Charges. The Washington courts decided against Lieutenant Graham in his attempt to collect \$500,000 from Mrs. Humes, the noted metropolitan millionaire, but the young naval officer has filed charges of criminal perjury and requested a new trial.

A ruling on this matter is to be heard in the meantime. Mr. Glennan, a Norfolk banker, is pushing his case for \$50,000 against the lieutenant vigorously.

Mrs. Elsa Peotner - Graham - Humes is the pivotal figure in the drama of love and lust. As Elsa Peotner, she eloped in New York with Graham ten years ago, when it was supposed she was engaged to Augustus L. Humes, a divorced man in New York and married Humes.

Asks \$500,000 Damages. Lieutenant Graham then charged that Humes, who is a prominent figure in the city's financial circles, had seduced her and that she had been ruined by the loss of her reputation.

Proceeding after having won the young wife's love. For the loss of said love, the lieutenant asked \$500,000. Mrs. Peotner-Graham-Humes laughed when she heard of it, saying: "I would have brought my divorce action if I had never known Mr. Humes."

Increase Egg Crop Value by Better Marketing Methods

When it is considered that the value of the poultry and egg crop is equal to that of either the hay or wheat crop, and that there is a total annual loss of nearly eight per cent of the egg crop, it is evident that many producers would be benefited by a change in the methods of handling marketing eggs. Investigation by the United States Department of Agriculture have shown that a good share of this loss occurs as a result of improper handling between the farm and the market, and much of the carelessness is attributed to the habit of considering eggs a by-product and, consequently, giving them poor care.

Organize Egg Producers. In many communities the problem of getting better returns for eggs has been satisfactorily solved by the organization of several farmers or farmer's wives into little associations known as egg circles. These organizations have been useful in improving the quality of eggs in various ways in addition to better methods of marketing. Some of them have given much attention to selecting standard breeds that lay more or larger eggs. They have also made a study of better care, feeding, and shelter.

To improve the quality of the poultry stock, one of the most successful egg companies has a large incubator house of 13,000 eggs capacity, where early chicks are hatched for the members at low cost. The eggs are all guaranteed to be true to grade and are sold in various grades on their cartons or cases, and market prices are paid to the members.

Twice a year dividends are paid each member in proportion to the number of eggs marketed through the company during the time of year eggs were brought in, a larger dividend being paid per dozen for eggs brought in during the fall and winter months than for those brought in during the spring and summer. A regular grade is established with discriminating consumers, with city clubs, with the best class of hotels and restaurants, and with fancy grocers. The company does the time of year eggs were brought in, a larger dividend being paid per dozen for eggs brought in during the fall and winter months than for those brought in during the spring and summer. SCORES GRASPING FARM LOAN FIRMS

Agricultural Conference to Hear Facts, Says Secretary Wallace.

[BY ASSOCIATED PRESS.] Washington.—Determination to lay before the national agricultural conference next week the thoroughly selfish and grasping attitude of many companies of different sorts which loan money on farm mortgages, was announced Friday by Secretary Wallace.

Explaining that many farmers who have never done so before, are having to mortgage their lands to get necessary money, Secretary Wallace said, "It is disconcerting to note that the farmers and individuals who are in the business of loaning on farm mortgages are taking advantage of the farmers' distress to extort heartlessly a rate of interest and terms of loan which cannot be justified."

"Farmers, he said, were being compelled to pay 6, 8, and 7 per cent on 5 to 10 years loans, without optional payments, and also a commission of 5 to 8 per cent, while in some cases as high as 10 per cent was being added. The secretary also charged that many loan companies were cutting down the amount they loan per acre to the lowest possible point, thus restricting the farmer's credit at the very time when it should be expanded as far as may be done safely."

The secretary announced that 325 delegates had accepted invitations to attend the conference. Most of the 423 invitations were issued, he said, of which 200 went to farmers and farm groups, 75 to state agricultural officials, state agricultural colleges and state editors, and 48 to allied industries. Seventy-three invitations were declined.

WILL NEED \$400,000 FOR EQUIPMENT PACKING PLANT
Paro, N. D.—Estimates as to the amount of money needed to open a poultry packing plant, between \$250,000 and \$400,000 by J. M. Casey, retiring president of the old board of directors. The new board, headed by C. Reichert of Carleton, elected at the annual meeting of stockholders today, has set out to raise this amount by the sale of certificates of indebtedness to stockholders in attendance at the meeting. The new board has set out to raise this amount by the sale of certificates of indebtedness to stockholders in attendance at the meeting. The new board has set out to raise this amount by the sale of certificates of indebtedness to stockholders in attendance at the meeting.

R. R. IMPROVEMENTS
Chicago.—A symposium by a number of prominent railroad officials on conditions in the transportation industry makes clear the fact that large expenditures are being contemplated during the forthcoming year in the direction of maintenance of way and equipment in order to make good the comparative neglect of these requirements during the period of Federal control. The executives are unanimous on the point that lower freight rates cannot be effected until further reductions in wages are put into effect.

DEPARTMENT STORE BONDS
A group of New York city and Philadelphia bankers has purchased \$200,000 of 20-year 6 per cent bonds of Strawbridge & Clothier. Philadelphia department store owners, the bonds will be offered soon to the public at a price between 99 and par, it is reported.

TAFT UNRECOGNIZED IN CITY OF BOYHOOD
Cincinnati.—William H. Taft, chief justice of the supreme court of the United States, walked the streets unrecognized while viewing the scenes of his boyhood haunts on a recent visit to Cincinnati.

The chief justice started for a long walk from the home of his brother, Charles P. Taft, on Fourth and Pike streets. His route included Mt. Auburn, his old home place, and the streets around Woodward high school, which he had attended.

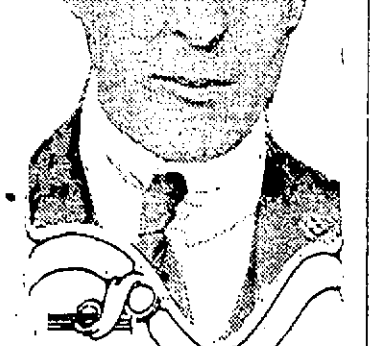

Mr. Taft found standing many houses which he remembered well, looking just as they did when he went to and from school except that they were older in appearance.

A unique feature of his walk was that, while he visited sections where he once had known hundreds of persons, he did not see a soul he knew or who knew him.

"That shows how much things can change in twenty years," Mr. Taft said in discussing his tour.

\$1,000 AND COSTS
Kenosha.—Herbert L. Millager, proprietor of Central park and the first of the men convicted of liquor violations, under Grand Jury indictment in Kenosha, was sentenced late Friday to pay a fine of \$1,000 and costs.

RARE COLLECTOR PAYS INCOME TAX OF FIVE FIGURES

Ed Kohler.

Income tax officials at Pasadena Cal., are due to faint again when Ed Kohler walks in next time in his conductor uniform to make the payment of his income tax. The last time Ed paid his tax it ran into five figures for the year. A New York uncle left Kohler a cool million, but he still collects fares on a Pacific Electric Street car line, running in Pasadena. "It'd take more than a million to make me a plutocrat," says Kohler.

WEEKLY FINANCIAL REVIEW

Loans to Railroads Show Improved Money Conditions

An eastern financial writer calls attention to the significance of the flotation of the \$20,000,000 mortgage bonds of the Southern Railway. The total issue was \$20,000,000, of which \$15,000,000 was used for refunding its gold notes and the balance for development of the roads, physical condition. The new issue is a 25 year 6 1/2 per cent bond. It is the first of the announcement made on Thursday by the C. M. & St. P. road that the government had approved a loan of \$25,000,000 for five years, to be repaid by the government on June 1, 1921, due March 1, 1922. The new loan runs for five years. This is interesting to the people in Southern Wisconsin since the road is the main artery of commerce, development and transportation of this territory. The St. Paul borrowed \$25,340,000 from the Government on Jan. 1, 1921, to pay off the outstanding bonds of the St. Paul & Northern Pacific, and the St. Paul bonds of that amount. The present Government loan will be secured by \$20,000,000 of the company's general mortgage 5s and \$5,340,000 of the general and refunding 6s.

So far as earnings of these companies are concerned, both have apparently turned the corner. Southern Railway, in common with all roads, has turned the corner of 1921. In the year for the first six months of the year the net earnings after taxes and rents amounted only to \$2,142,947. In the eleven months ended Nov. 30, however, net earnings aggregated \$12,165,124, or an average per month of something better than \$2,000,000 in the last five months. Ordinarily the fixed charges of the company do not exceed more than \$1,600,000 for a full year, so it is evident that while actual earnings for the calendar year will not completely cover the interest charges, the investment earnings power is probably sufficient to cover them one and one-half times over. In Wall Street it is felt that earnings at present are so substantial that a resumption of the dividend on the preferred stock of the company is not far distant. These dividends would require but \$3,000,000 a year.

As for St. Paul, the earnings during the first eleven months of 1921 amounted to \$5,987,039. For eight months of 1921 the company was struggling with a deficit in earnings, but the turn came in July. By the end of August the deficit had been overcome and met for the eight months aggregated \$188,915. The last three months, therefore, have contributed about \$5,000,000 to the company's earnings power. While this is not yet sufficient to cover the fixed charges, the management has been confident that earnings would improve, has steadily cut down on expenses, and has been liberal with maintenance charges. During the first eleven months of 1921 it expended 50 per cent more for maintenance of the property and equipment than it did in the full year of 1920. The company's management took charge of the carriers. It would appear that before long results of this policy should be reflected in the income account.

Of course, the fact is the fact that neither company has any large maturities now for several years. The most important one for St. Paul is a \$27,000,000 foreign loan in 1925, while Southern Railway has nothing larger than \$2,000,000 maturing in the next sixteen years, with most of the heavy maturities much further away. Southern Railway is reaping the benefit of many years of prudent management, when funds that might have been paid in dividends were ploughed back into the property and are now yielding fruitful returns.

BUILDING IN STATE SHOWS GOOD GROWTH

December building contracts in the State of Wisconsin, according to the R. W. Dodge company, amounted to \$3,405,700. This was an increase of 69 per cent over November and more than two and a half times the figure for December, 1920.

The total volume of building construction for the year 1921 amounted to \$65,219,500, which was 25 percent less than the 1920 total. While rapid recovery is not to be expected in this section of the country, this year ought to see an increase in building activity. The figure for the closing month of 1921, although not in itself large, is one of the indications of improvement.

Residential building, which has been the dominant factor elsewhere during the past year, amounted to only \$15,524,700 in Wisconsin, thus taking second place, the leading class of work having been public works and utilities, with a total of \$18,453,600. Residential building in particular ought to show a marked increase in 1922.

TARIFF UNCERTAINTY CAUSES SLUMP

Cleveland.—There has been a very noticeable slump in the textile industry in this section. Mills are reducing force and also number of hours. The change is attributed to uncertainty among manufacturers regarding tariff legislation and the amount of protection they will be given. It is significant that imports of textiles are appreciably increasing.

NOR AS "BAD DEBTS"
The Secretary of the Treasury evidently expects to classify evidences of foreign indebtedness to the U. S. A. as tangible assets and not as souvenirs.—Washington Star.

LOAN TO FRANCE
New York.—An international banking house which floated a series of French municipal securities during the war has concluded negotiations for a loan of about \$25,000,000 to the Department of the Seine. Formal announcement awaits the early settlement of certain minor details.

POWER CO. NOTES
The Central Union Trust company of New York has been designated trustee of a \$2,000,000 issue of two year 6 1/2 per cent collateral trust notes of the Washington Water Power company and the \$1,000,000 issue of the 5 per cent sinking fund debentures of the Consumers Light, Heat and Power company.

Business is coming back—and not for its umbrella.—Boston Herald.

HERE AND THERE

Market for silk goods has improved.

Heavy movement of raw cotton continues into New England.

No one seems to be optimistic over the future of cotton prices.

The DuPont Fibres company has raised capital to \$2,700,000.

Auto show sales in New York were larger than in 1921.

War Finance Corporation is loaning the rural合作社 over \$1,000,000 a day.

Municipal bonds continue to be one of the best security sellers.

The Burlington will sell \$20,000,000 5 per cent bonds to be used on improvements and new lines.

Gold in the United States in 1921 increased \$2,154,000.

Kansas banks in spite of low prices for products and livestock have been receiving much money in the liquidation of loans and Kansas City banks report that this has had an effect there in banks taking up many loans held in this banking center.

An item of interest to railroad owners is the resignation of A. M. Cleveland, passenger traffic manager of the Northern Pacific and connected with that road for 33 years. Arthur B. Smith has succeeded him.

Market tip is that Corn Products is likely to sell at \$15 a share.

Calumet & Hecla announce the mines will begin operation on April 1.

Anacosta copper company announces that its mines are being put in shape for an early resumption.

Allis Chalmers is active on the report of \$25,000,000 quick assets and about 70 per cent yield.

German cotton mills are reported as operating about 80 per cent capacity.

Creditors want sale of General Oil company properties.

Idle freight cars increased 27,978 during Jan. 1 and 8, the largest number being idle now of any period in four years.

St. Louis, Mo., companies, or Skidgen in Missouri, have been refused licenses in Indiana.

City of Philadelphia is selling \$10,000,000 30-year bonds.

Czechoslovakia has arranged for an American loan of \$25,000,000.

The Armour report of losses in operation has not made a ripple as it had long since been discounted.

Division of the operations of the company and the cessation of the earning of fruit and vegetables on government order has caused heavy losses to be taken in the sale of stocks on hand.

The price of a rich silver ore vein in the South Hecla mine at Alta, Utah, has renewed interest in this district. The ore assays \$47 for the outside edge. Other ore assays \$60 a ton. The discovery was made in a 2,000 foot tunnel and.

The Fisher Body company of Cleveland is running night and day to fill orders. This is indicative of the revival of the auto trade.

Well tea company report a turn from heavy losses to a small profit margin. Raymond D. Durbin will be succeeded by John M. Hancock as president. The company has received its outstanding notes to \$1,000,000.

Organization of the Willys-Overland company is proceeding slowly and the position of the company is improving.

The Continental Motor Corporation shows a loss of \$71,534 for the year ending October 31, 1921. The net profit in 1920 was \$5,507,521.

The British treasury will cut its next bond issue from 5 1/2 to 5 per cent.

Harris, Forbes & Co. are offering a new issue of \$21,000 city of Hagerstown, Md., municipal 5 per cent bonds at prices to yield about 4.40 per cent.

The city of Milwaukee will vote on April 22 on an issue of \$4,000,000 of bonds.

La Crosse county sold \$400,000 of 4 1/2 road bonds Friday.

Build Now and Aid Nation, Plea of Contractors

Build now and dispel hard times in the message brought back from the National Construction conference at Cleveland by William Ford, contractor of this city. He has just returned with his son, Henry N. Ford of Cedarburg. The conference was held under the auspices of the Associated General Contractors of America.

"The time to start building and public work has arrived," declared Mr. Winston, the retiring president of the association, according to Mr. Ford. Having just completed a 20,000 mile tour through the United States, Mr. Winston stated that his investigations "show that the postponed construction projects now on the boards of architects and engineers reach the staggering total of twenty billions of dollars. The moment needs the construction payroll to restore buying powers of his customers. Not only the direct benefit is felt, but the indirect stimulus to many collateral lines providing materials for construction."

"Construction is the proper starting point because the latent demand is greatest in this line. Five billion dollars of expenditure is long overdue in railroads."

1921 Income Tax Blanks Now Ready

Let us make out your returns and you will know that they are absolutely correct and conform in every way with the State and Federal Income Tax Law.

Oil Prices and Investments in the Texas Field

With the new field at Mexia, Texas showing up, the speculation in oil stocks has been renewed and the public is again asked to buy shares in companies, both wild cat and those that are not. This too has been stimulated by the advances of 25 cents of Mexia crude by the Humble Oil and Refining company, and that has put a different face on the oil industry. The National Petroleum News says that when the second cut on Pennsylvania crude was posted Jan. 9, the general opinion of the industry was that it would be followed by a reduction in the posted price of Mid-Continent. The chief reason for this belief was that previously reductions in the price of Pennsylvania crude have invariably been followed by reductions in the Western grades. The fact that Mexia crude is in sufficient demand to raise the Humble Company to raise the posted price and the further fact that it is inferior to Mid-Continent crude, seems to indicate that there will be no reduction in Mid-Continent.

There is comparatively little speculation in storage at the Mid-Continent refineries and practically none at the north Texas plants. The buyers are buying only to fill immediate requirements and have been purchasing in the way for some weeks. That means that some of them are close to the bottom of their tanks and will have to come into the market soon.

The fact is that the oil business is in a bad way just now and any stocks on the market should have the most careful scrutiny. Losses from shrinkage have been great, amounting to many millions and oil stocks have probably absorbed more loose millions of dollars in the last five years than any other kind of stock in the United States.

Protection in the Dow Jones pool seems to be over, although it will figure as an important pool for a long while.

R. R. TRUST CERTIFICATES.
The director general of railroads has announced additional sales at par plus accrued interest of a total of \$4,208,400 of railroad equipment trust certificates, now held by the government of which the Continental and Commercial Trust & Savings bank, Chicago, took \$2,824,000 of advances to the Gazette Financial.

Save, young men, and become respectable and respected; it's the quickest and surest way.—Benjamin Franklin.

The idea we associate with Benjamin Franklin is the idea of Thrift. He has been called "the apostle of thrift." Savings banks throughout the country have been named after him, and this week commemorating the 216th anniversary of his birth has been set aside as Thrift Week.

What would have been Benjamin Franklin's attitude towards the Christmas Club?

Undoubtedly he would have endorsed it as he endorsed the savings plans of his day.

Take his advice, it's sound.

editor has had no bad effect on prices.

What with the sediment and salt water which has shown in several of the wells, the depletion of the field is at the rate now where some estimate can be made of its possibilities. The Mexia field has reached a high mark of 152,000 barrels, but the general average for the past week was 123,000 barrels and the peak was attained as the result of flush production coming all at once. It is now estimated that the field will decline at the rate of 1000 barrels daily for a considerable time.

All the foregoing applies to the "big pay" area of Mexia production, as now outlined. What will be developed to the northeast where the operators, who opened the Mexia pool, have outlined other structures pronounced promising, is a question for future determination. In the vicinity of the Meador well of the Thompson interests, another test is showing for a well, probably of the same calibre as the Meador well. The latter has been making about 400 barrels daily for some weeks.

Elsewhere in Texas, with the single exception of Orange, on the Gulf Coast, production is declining. In Arkansas-north Louisiana light oil territory, Maynesville has the lead and, with an estimated production in the region of 50,000 barrels at this time, promises to maintain that position for some time.

With the new Continental pool of Oklahoma encountering water in many of the wells, the Burbank area is the biggest in sight now. Production in the Bowditch pool is declining and the big days of this pool seem to be over, although it will figure as an important pool for a long while.

GOODYEAR BONDS
Goodyear Tire and Rubber company 10 year 8 per cent sinking fund of old debenture bonds announced.

at the office of the Central Union Trust company of New York, according to Dillon, Read & Co. Prompt presentation with temporary bonds in numerical order will facilitate the exchange, it was announced.

Tax Exempt Bonds May Be Stopped by Amendment

Financial conditions and heavy taxes have directed much attention to the proposed twentieth amendment to the Federal Constitution. It affects all taxpayers without regard to political affiliations.

Three resolutions providing for an amendment to permit Federal taxation of State and Municipal bonds have been introduced and referred to Congressional committees.

They are all in harmony with the recommendation of President Harding's message to Congress.

"I think our tax problems, the tendency of wealth to seek non-taxable investment, and the increasing increase of public debt, Federal, State and Municipal, all justify a proposal to change the Constitution so as to end the issue of non-taxable bonds."

The last resolution introduced, that by Representative W. R. Green of Iowa, is received with favor because it prohibits any discrimination between Federal and State securities. The Ways and Means committee of the House has it under consideration. It would add as the amendment the following:

"That from and after the adoption of this amendment as part of the Constitution the provisions of the sixteenth amendment to the Constitution shall apply to and include income derived from securities thereafter issued or created by any State or political subdivision thereof, or any dependency of the United States; but taxes on incomes derived from such securities must be laid without discrimination in favor of income derived from other securities of the same term and general class issued or created after the adoption of this amendment as part of the Constitution."

New York.—Resignation of Allan A. Ryan as a director and chairman of the board of the Stutz Motor Car Company of America, is announced.

It was learned that he had become a director and chairman of the board of the Frontenac Motor Car Company of America, recently incorporated with a capital of \$1,000,000. Other officers of the Frontenac company are Louis Chevrolet, vice president, and Kenneth R. Howard, secretary and treasurer.

IOWA BANKER AND A CLIENT.
An Iowa farm mortgage banker says a client refused to renew a \$2,000, 5 1/2 per cent loan this month, stating the case like this: "The annual interest was \$110. The client had on that amount was \$75, leaving only \$35 net revenue. The client called the loan and invested in tax-exempt securities. This instance, multiplied over and over, means that the farmer must bid

WHY
be satisfied with anything but the best?

Especially where the investment of your money is concerned.

Municipal bonds are payable from taxation and taxes must be paid. The tax collector will not accept the excuses of poor crops, low prices, no business, but sells your property if you do not pay your taxes and it is from these taxes that our bonds are paid.

Our January circular will be sent on request.

"Buy your bonds from a bond house."

Rock County Savings & Trust Co.

has arranged with Chicago Trust Co., Agent for METROPOLITAN LIFE INSURANCE CO., to handle that company's building loans in Janesville.

Essential Points of the METROPOLITAN LOAN PLAN

1. LOAN—Up to one-half of combined value of land and net cost of building.

(\$2000 to \$5000 on new houses; proportionate amounts on new apartment buildings.)

2. PAYMENTS—3% of principal, plus interest semi-annually. (Monthly payments may be arranged with the bank.)

3. INTEREST—Current local rate.

4. TERM OF LOAN—15 Years. (May be prepaid in full after 3 years if borrower desires, or partially prepaid on any interest payment date.)

5. COMMISSION—For its service in appraising, disbursing, preparing papers, etc., the bank receives a nominal commission to cover the expense involved.

EXAMPLE: Value of lot \$1,500.00
Cost of house \$8,500.00

LOAN—(50% for 15 years) \$5,000.00

(Loans are made only on new construction, or on homes less than one year old and not permanently financed.)

The average cost to the borrower per \$1,000 is \$7.50 per month, which pays both principal and interest, clearing up \$7% of the loan in 15 years—or before, if larger payments are made.

THE BUSINESS OF FARMING—LIVE STOCK—DAIRY—FARM BUREAU

THIS COW PAYS DIVIDENDS

Johanna Beauty, Holsteins, owned by John Wehinger and Son. She cost \$250 as heifer and now has returned \$2,000 for her.

SHOW CATTLE MORE. URGES WEHINGER

County Should Have Show Herd for State and National Shows.

Good cattle brought better results to John Wehinger and his active son in just three years. Previous to this time he started with blooded Holsteins. Wehinger had high producing grades. He had all ways used a blooded sire. "Half-bred" as he expresses it. His milk checks ran from \$460 to \$500 a month, and he has the slips to show it, simply because a cow had to be a good producer to stay in his herd. His son, attending high school, became interested in blooded cattle. Starting in a modest way, and having a blooded sire, they laid a foundation for what is now the highest producing herd in the cow testing associations of Rock county. The Wehinger herd averaged better than 13,000 pounds of milk and 450 pounds of butter fat in last year's test. One does not have to figure to prove that this production is profitable.

Good Breeding Stock. But milk production is just an angle of the better cattle proposition. A few years ago the Wehingers purchased a well marked heifer for \$250. This cow now holds the state production record as a 4-year-old, making 704 pounds of milk and 38.25 pounds of butter. Her name is Johanna Beauty. Said to be the best cow in the county, she is a 4-year-old to top 100 pounds of milk a day. Johanna, with four others in the Wehinger herd, goes on test, Saturday, and much is expected of this animal.

It would be hard to find a herd of Holsteins anywhere with better udder development than the Wehingers' who are great on breeding production animals. Johanna Beauty Butties was bought for \$250, and the owners have turned down numerous \$2,000 offers for her. The junior herd sire, Beauty state record cow, and was sired by the John Goldthorpe bull.

Great Junior Sire. The young sire is a coming champion, and in addition to being a good show animal he is backed with the production record of his dam. The senior sire is Woodcrest Clyde, out of a 25 pound dam.

The fact is that \$250 heifer was a good buy for the Wehingers. Johanna Beauty Butties paid for herself in milk and brought in exceptional dividends in calves. Her calves sell for many times the price paid for the mother.

Some object to Holsteins because of lean butter fat, but Howena Van Tille in a semi-official test produced 18,000 pounds of milk and 700 pounds of butter fat in eight months. This cow also has a seven day record of 550 pounds of milk and 22 pounds of butter fat. Were her color markings yellow instead of black, she might pass for Guernsey as far as butter fat production is concerned.

This cow has a cow testing record of 21,096 pounds of milk and 736 pounds of butter fat in a year.

Said to show better results from our grade cattle because we used blooded sires, and we are getting better results from our blooded cattle because we can sell the calves for \$20 to \$40 and obtaining from \$150 to \$200 once the foundation is laid.

The Wehingers are not the only cattle breeders in Rock county to believe in collecting a county herd next year for showing. A county herd for the national dairy show and state fair should be on the development program of Rock county.

85 Durocs in Auction Here on Tues. and Wed.

There will be 85 head of registered Duroc-Jersey gilts and sows offered in the two auction sales to be held on the Janesville fair grounds Tuesday and Wednesday next week. The first sale, Tuesday, will be of stock from the Fashioncroft herd of Clarence Croft, and those on Wednesday from Parkhurst, owned by E. H. Parker and Son.

These are the first of four Duroc sales in Rock county, and are held in the United States that are raised in Rock county. So good are the Duroc stock of Rock county that when the agriculture department of the Wisconsin university desired the best blooded herd sires they bought the red Durocs in Rock county. Breeders offering the stock declare that prices will be reasonable on the stock to be offered, for high bids are not expected considering the prevailing markets.

A. W. Thompson, York, Neb., will be the auctioneer at the two sales next week, and C. E. Culver clerk.

Tubercular Cattle May Not Show Any Lesions. There is a mistaken notion concerning the evidence of cattle tuberculosis founded when the animal is slaughtered and there are few, if any, lesions found. The presence of lesions, according to Dr. Arthur Kilians, is certain proof of the disease. Failure to find the lesions is by no means certain proof that the animal is not affected.

3 FARM EVENTS HERE ON JAN. 26

Duroc Sales, Booster Meeting and Beekeepers Session During Week.

FARM EVENTS. Duroc-Jersey swine sale—Clarence Croft, fair grounds, Janesville, Jan. 24. Executive meeting of Rock county Farm Bureau—Court house, Janesville, Jan. 24, morning. Duroc-Jersey swine sale—E. H. Parker and Son, fair grounds, Janesville, Jan. 25. First annual Rock county Farm Bureau banquet and meeting—Janesville, Y. M. C. A., Jan. 26, noon. Rock county grain growers' meeting and show—Janesville, Y. M. C. A., Jan. 26, morning. Livestock breeders' meeting in Y. M. C. A. afternoon. Rock county beekeepers' meeting—Court house, Janesville, Jan. 27. Newark township Farm Institute—Woodcrest hall, Feb. 15.

Next Thursday will be farm booster day for Rock county. There is to be the county Farm Bureau banquet, starting at noon in the Janesville Y. M. C. A. building. The program for this session will be short, with only one speaker, Theodore Macklin, Madison, one of the most practical and logical experts on farm marketing in the United States.

The speech by Mr. Macklin should attract many farmers and also many city men interested in the welfare of the farmers. His recommendations on marketing are not founded on theory. Rather, Macklin is an exponent of practical farm facts.

The great farm difficulty is not production, rather it is marketing. What a farmer has already produced. Selling tobacco at five cents a pound is a typical example of poor marketing methods. Farmers must pay more attention to marketing.

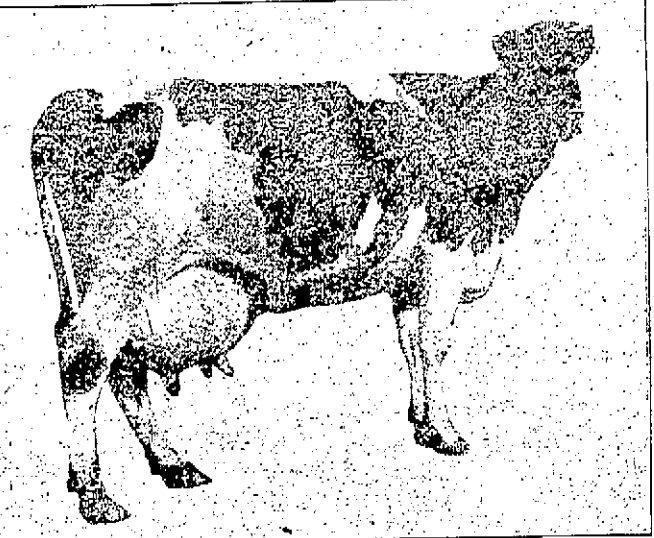

We Hold Grain Show. The banquet is for all farmers, whether bureau members or not. Following the speech by Mr. Macklin, all farmers' and city men will be asked to consider a more effective and closer county organization for livestock promotion. The building of the county livestock and sales pavilion is to be urged and plans explained. It is desired to have breeders not now in county breed associations unite for better sales.

The grain show will be held in the morning. Officers of the Rock county association interested in the promotion of better grains. With three features for the day, Jan. 26 will be farm booster day, and all men interested in agriculture are urged to attend.

Beekeepers to Meet. There will be a morning and afternoon meeting for the beekeepers of Rock county in the courthouse. These meetings will be held Friday, Jan. 27. It is proposed to further cooperative buying of beekeeping supplies and marketing of honey. A county association is to be formed. H. S. Wilson and L. D. Whitehead, Madison, will attend the meeting.

Newark township is planning a one day farm institute for Feb. 15. A good program is being arranged by the committee.

UDDER TELLS MILK PRODUCTION

Holsteins on Wehinger farm show unusually good udder development. The official and cow testing records show that they can produce profitable milk.

one speaker, Theodore Macklin, Madison, one of the most practical and logical experts on farm marketing in the United States.

Badger Brand Seeds

Exceptional Purity--High Germination Absolutely Free of Noxious Weeds have made

Badger Brand Seeds the largest seller in Wisconsin

For Sale by EDW. WILEY & SON, Janesville 120 Park St. Bell 114

It will be a benefit to both farmers and city men.

Better Farming Means a Better County

The activities of the Farm Bureaus and the farm advisors in so far as they have to do with commercial and cooperative activities are confined largely to the development of better selling methods of farm produce.

It means much to the farmer, and it means more to the cities for the farmer to get a fair price—a price at least above production costs—for his produce.

Prof. H. W. Mumford stated that under the present system American farmers were in danger of becoming "a peasant class."

No One Wants This State of Affairs

The Rock county Farm Bureau calls upon both the farmers and city interests to help in the program of "Rock County First." Here are some of the things we can all help for a better farming district and better cities and villages.

1—Full cooperative help in the building of a livestock pavilion for judging, demonstration and sales. It means much whether the farmer gets \$40 for a cow or \$200 and whether he gets \$30 for a hog or \$75.

2—Increase of home markets. Produce raised in Rock county should be sold in the county first. The Farm Bureau asks our merchants to encourage the sale of Rock county products raised by our farmers.

3—to help the showing of Rock county products to advertise the county.

4—to aid and support the junior livestock and grain clubs for obtaining a more intelligent agriculture through the youths of the farm.

5—The Farm Bureau wants the support of the urban residents on legislation to aid farming such as prohibiting the sale of "filled milk," the truth-in-fabric laws and lower freight rates.

6—Both the farmer and city interests should unite in a demand for lower taxes. Farmers are borrowing money to pay their taxes this year. Full cooperation will mean lower taxes for everyone.

7—All in all full coordination and cooperation to make "Rock county First"—and that means farms, villages and cities.

Let's get in the same boat and pull the same oars.

Rock County Farm Bureau. H. C. Hemmingway, President. C. E. Culver, Secretary, Court House, Janesville.

Snowy Roads And The Steering Gear

They Bring Out All Its Weaknesses As Nothing Else Does

UNDER NO CONDITIONS DO defects or weaknesses in the steering gear become so annoying and even dangerous as in driving through hard snow, or among icy ruts and to meet these conditions successfully, the gear should be in perfect adjustment and free from excessive lost motion. It is not generally realized how important the camber of the front wheels is, in respect to easy and positive steering. With the wheels set straight ahead, a plumb line held against the highest point of one of the tires should mark a point on the floor $2\frac{1}{2}$ inches outside the lowest point of the tire, in the case of a 32 inch wheel. This cambering brings the point of tire contact with the ground much more nearly under the pivot-bolt, upon which the wheel turns, than as if the wheel set in a vertical plane and thus enables the wheel to be turned with comparative ease besides making it less subject to deflection by road irregularities. Wheels are given the correct camber at the factory, which should be permanent, but as a matter of fact, there are many cars, especially old ones, the wheels of which have insufficient or no camber and it is well to have this point checked up occasionally. In the interest of good steering, it is by no means unheard of for a front axle to sag and reduce the camber, wear of pivot bolts and their bushings tends to diminish it and it very often happens that, after a front axle has been bent and straightened, the "setting" is improperly performed with no regard for the required camber. An even more common cause of difficult steering in snow, is incorrect wheel alignment. If the front tires are not very nearly the same distance apart, measured between their most forward and their most rearward points, so that the tend to run about parallel, and especially if they "toe out" rather than "in," there is an abnormal tendency toward constant irregular deflection. The best results are obtained when they toe in about $\frac{1}{8}$ inch. It almost goes without saying that any unnecessary bind or friction anywhere in the steering system, whether due to overtight adjustment or lack of lubrication is especially to be avoided, when snowy roads prevail, as steering is hard enough without this hindrance. Lost motion is equally objectionable, as knocking a car is all too uncertain matter even with the gear in good order. Snow driving imposes frightful stresses on the steering mechanism and inspection of it should be frequent.

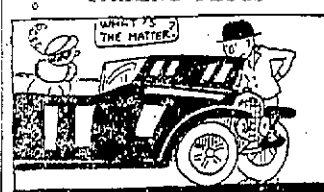

LUBRICATING SPEEDOMETER SHAFT

P. E. writes: Lately my speedometer has developed a noise, which though by no means loud, is quite annoying, as otherwise the car runs very quietly. How can this be stopped?

Answer: This noise probably comes from the speedometer shaft, which needs lubrication. It should be removed by unscrewing the union connections at the head and at the drive ends and unhooking the

melting and oozing through the casing.

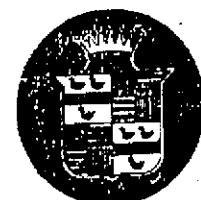

PRIMING PLUGS

W. P. writes: It is very difficult to make my engine fire on cold mornings and I generally have to remove two at least of the plugs and squirt gasoline into the cylinders, which is very bothersome. Is there any way to avoid this, short of attaching a regular manifold primer?

Answer: You can substitute priming plugs for the ordinary spark-plugs you are now using and, as these plugs serve as priming cocks, it will be a very easy matter to open the priming valves, squirt a little gasoline into each and close the valves. As an alternative you may find that by squirting a small amount of ether-gasoline mixture into the carburetor air-intake, closing the choke and cranking, you can make the engine fire.

Questions of general interest to the motorist will be answered by Mr. Clough in this column, space permitting. If an immediate answer is desired, enclose self-addressed, stamped envelope.

The Contact Points

are the busiest parts in an ignition system. They open and close as often as 4000 times a minute, and have to withstand a constant hammering action, also a tendency to burn, which the condenser reduces, but does not eliminate. The points are usually of highest quality Tungsten carefully welded to the arm or screw. The contact arm is carefully designed to work properly with the breaker cam and coil. Even the fit of the contact arm on the mounting stud may alter the timing of the spark and make a "cripple" of the best car ever built.

We use only Standard Parts.
